WORK EXPERIENCE

KPMG

Consultant

June 2022 – Present

Bangalore, India

Shell :

Trading and Supply

• Roles and Responsibilities:

- Market Risk dashboard end-to-end development
- Creating UI/UX designs using Qlik Sense out of the box charts and extensions
- Data model development using Star and Snowflake designs
- Migration of business logic from model end to the SQL backend layer for performance improvement
- Worked with integration of data from various relation and flat file sources

Capgemini

Senior Analyst

June 2020 – Present

Mumbai, India

HSBC Projects :

CWI (Compliance Wide Indicator) – which is to display RAG's in the front end for which a 3 tier architecture is built. The RAG's are displayed based on the threshold for the respective metrics based on the risk criteria.

• Roles and Responsibilities:

- Developed Transformation layers which made it feasible to understand point in time reporting using script load editor. Developed Weekly, Monthly and Quarterly scripts to fetch only the latest records from the extracted Data.
- Developed various Data Models which fetches data from transformation layers. Implemented a flexible way to extract the data by designing suitable Schemas.
- Transformed the existing script using Flat files as input to CDR input by creating point in time reporting without disturbing the data model which brought a good response from the business.

Other projects :

Cluster Management : A dashboard build to track all the other dashboard performance. Average time to load the dashboard, Average user timing on an dashboard.

Ask Compliance : A dashboard to monitor all the data related queries plotted over different demographics and locations.
